POWER RACK AND HALF RACK

PRECOR®
Fitness Made Personal

DBR0610

Power Rack

- Dimensions (L x W x H): 210 x 160 x 250 cm / 83 x 63 x 98.5 in
- Product Weight: 278 kg / 612 lbs
- Max. Lift Load Capacity: 363 kg / 800 lbs
- Storage: Ten (10) weight plate storage horns have an effective length of 17.2 cm (6.75") each; two (2) Olympic Bar storage receptacles; two (2) Accessory Hooks
- Number of Vertical Adjustment Positions: 14
- Adjustment Increments: 10.2 cm / 4 in
- Lowest Safety Rail Height: 50 cm / 19.88 in
- Inside Width: 106 cm / 41.75 in

DBR0611

Half Rack

- Dimensions (L x W x H): 180 x 155 x 250 cm / 71 x 61 x 98.5 in
- Product Weight: 206 kg / 453 lbs
- Max. Lift Load Capacity: 272 kg / 600 lbs
- Storage: Ten (10) weight plate storage horns have an effective length of 17.2 cm (6.75") each; two (2) Olympic Bar storage receptacles; two (2) Accessory Hooks
- Number of Vertical Adjustment Positions: 14
- Adjustment Increments: 10.2 cm / 4 in
- Lowest Safety Rail Height: 71.12 cm / 28 in
- Inside Width: 106 cm / 41.75 in

Discovery™ Series

Power Rack & Half Rack Features

The foundation of any facility, the Discovery™ Series DBR0610 Power Rack and DBR0611 Half Rack are the perfect tools for seasoned lifters and those new to strength training. The products' enhanced functional capabilities allow for the use of bands, chains, torso trainers, battle ropes, suspended bodyweight training and more, along with traditional Power Rack and Half Rack exercises.

Weight Plate Storage

The ten weight storage horns are 17.2 cm (6.75") long and 3.8 cm (1.5") in diameter, so they don't bind weight plates, making them easier to add or remove. The weight storage horns are situated at accessible heights and are spaced to accommodate all bumper-style plates simultaneously.

Functional Storage

Integrated Olympic Bar and functional apparatus storage is conveniently positioned to enhance accessibility. The two vertical Olympic Bar receptacles feature a rubber bumper to protect Olympic Bar ends from metal-on-metal contact. The two functional storage hooks accommodate bands, chains and other training accessories.

Step-up Platform

Two step-up platforms are positioned for easy access to the Chin-up and Pull-up stations. The platforms are dipped in a non-slip material and angled so that an Olympic Bar placed for front-of-rack exercises rolls towards the upright for a more stable storage position.

Dual Chin-up and Pull-up Handles

The Chin-up/Pull-up Handles can be easily accessed via the integrated step-up platform. Weight-assisted band hooks allow for numerous chin-up and pull-up opportunities for a wide range of exercisers.

Anchor Points

Two anchor points are positioned high and four are positioned low on the racks, with two additional anchor points included on the adjustable bar catches. All anchor points are rounded, which prevents excessive wear of bands and straps. Rounded gussets underneath the step-up platforms create unique anchor points for battle ropes.

Adjustable Safety Rails & Bar Catches

Adjustable safety rails and bar catches come as standard on both racks, increasing exerciser and operator confidence. The dual pin design of the bar catches and adjustable safety rails provides additional strength and stability, while also preventing the adjustable safety rails from rotating. Replaceable high-impact polyurethane wear guards protect the racks from metal-on-metal contact.

Straight Chin-up/Pull-up Bar

A smooth, straight Chin-up/Pull-up bar allows for kipping-style pull-ups, chin-ups and muscle-ups, and serves as a convenient anchor point for suspended bodyweight apparatuses.

Discovery™ Series

Power Rack & Half Rack Optional Accessories

Lifting Platforms

243.84 x 182.88 cm (96 x 72") Olympic Lifting Platform with built-in Rack insert. The platform is tongue and groove oak flooring with a six-layer, custom water-based polyurethane top coat. It features 1.9 cm (3/4") high-density rubber landing zones, a 0.317 cm (1/8") steel frame and a built-in ramp with a black wrinkle powder coat finish. Lifting platforms are available in thicknesses of 3.8 cm (1.5") or 7.5 cm (3"). A custom logo option is available for an additional cost.

| Product Code | Description |
